# Vagrant

# Vagrant Installation

## Download & Install :

- \* Git Bash (git for Windows)
- \* Oracle Virtual Box
- \* Vagrant

Open → Git Bash

```
#vagrant --version
```

## step-1: to initialize a vagrant box

```
#vagrant init ubuntu/trusty64  
(or)
```

```
#vagrant init centos/7
```

## step-2: to configure vagrantfile :

```
#vi Vagrantfile
```

```
config.vm.network "private_network", ip:  
"192.168.33.10"
```

```
vb.memory = "1024"
```

```
vb.cpus= "2"
```

```
:wq ----> write and quit
```

**step-3: to start to server :**

**#vagrant up**

**step-4: to connect to server :**

**#vagrant ssh**

**step-5: to shutdown server :**

**#vagrant halt**
